

# Dunstan Baby Language

**The secret language of babies revealed!  
Build your confidence and connection with your newborn by understanding what their cries mean. Settle them faster and enjoy a happier, more contented infant who sleeps longer and cries less.**

Dunstan Baby Language teaches parents how to identify their baby's basic needs by understanding the different sounds they make and what they mean. It recognises a universal language shared by all babies from birth to 3 months regardless of race or gender.

You'll learn which sounds your baby uses to express hunger, tiredness, need to burp, lower wind and discomfort. Supported with an understanding of your baby's language and suggested settling techniques, you'll be able to respond quickly and effectively to your baby so you have more time to enjoy parenting.

## **Course Duration**

Saturday 4 September

10am—2pm

Fee \$75 Inc GST

Ourimbah Campus

Tutor: Night Nannies

**Fast, easy and secure enrolments anytime at
